IMPORTANT   IMPORTANT   IMPORTANT   IMPORTANT

Be at the JUNE Meeting to Vote For New Officers. It's your Club so do your part!

Minutes of the May 14, 1986 UnBoard Meeting (Bored Meeting) - AARC

The official Scribe being a Lost Object, a Dubious utterance substituted. The president AL7BK, VP Bud, BB, YF, ITI, Jim and Pending Mana and ~~Q~~ were the onliest - somewhat shy of the required to create a quorum - BS ensued - beer sipped - calls made - But no quorum materialized. Pitty. DU

ANCHORAGE AMATEUR RADIO CLUB, INC.  
Minutes of Board of Directors Meeting, May 21, 1986  
Home Electronics, 3203 Arctic Boulevard

Present: President Lance Dunbar AL7BK; Vice-President Bud Laws KL7IBZ; Secretary David Epstein KL7LO; Trustee Bill Reiter KL7ITI; 3-year Board Members Jim Larsen AL7YS and Fred Toliver KL7HM; 1-year Board Members Steve Wilcox KL7JIM, Cathi Moody KL7NR, Rick Marvin KL7YF, Bill Capers AL7BB, Rod Manay KL7SA, and Ed Tucker KL7DU. Not Present: Treasurer Seth Head NL7FZ, Past President Daniel Stevens KL7WM; Activities Manager Linda Harmon NL7VY; 3-year Board Member Harvey Bookus NL7DK.

The meeting was called to order at 6:58 pm AKDT by President Lance Dunbar AL7BK. KL7ITI moved, and AL7BB seconded, that we dispense with the reading of the April Board and May general meeting minutes. The motion carried.

Lance announced that the club had received \$553 from Jackpot Bingo as proceeds from the use of the club's bingo license by that organization on April 19, 20, 21, and 24. While we're on money, Lance also said that UAA was holding \$1,000 of our scholarship money that had yet to be applied to scholarships over the past 2 years. They had contacted the club and asked, "What's your pleasure?" The Board decided that we will recover the money and redistribute it to other scholarship purposes.

We discussed the Alascom Rabbit Creek site and the Minchumina link. It is proposed that a portion of the link equipment be housed at said site. It won't be for free -- it will cost us a \$96 one-time fee plus \$10/month for electricity. KL7LO moved, and KL7JIM seconded, that the club pay the fees for housing of the link equipment at the Alascom Rabbit Creek site. The motion carried.

Lance told us that there are still some 1986-87 club board member/officer slots open and that he proposes that we hold the June elections in reverse order, i.e., vote on the 1-year board members first, then the 3-year board members, etc. Those who don't get elected to the board would have the opportunity to run for officer positions. KL7HM suggested that candidates be allowed to utter candidate speeches; this will be allowed. The Board decided to adopt Lance's suggestion and hold the June elections in reverse order.

Lance told us that the Hands Across Anchorage Committee had contacted him in desperation for communications assistance for their May 25 event. This happened because commercial radio plans failed to come together for them. We will come through like the heroes we are!

There was no news on the Field Day site. KL7NR will check on potential sites on base (and any foreseeable security problems) and AL7YS will check on the availability of the Kincaid Park warming hut site.

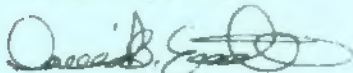

Lance recounted as how Mother's Day at Sears Mall had gone reasonable well. The club passed approximately 750 pieces of traffic to K7IFG. That station will be recognized by the AARC for his assistance via a plaque.

Lance said that he had not yet received word from the golf people on the 1986 State Golf Tournament. It is an event held in July. We anticipate the need for two VHF stations and two computers. It was noted that this would be a good event during which to flex our pocket radio muscles.

Lance told us that he had received a call from Rosemary Manrath KL7LA. "Ro" said that she had been in contact with a mountain climbing party from Pennsylvania that wanted to know about repeaters in Alaska. Apparently, this group is going to attempt an ascent of Denali in July. It appears that, if their plans come about as we think they might, the group might be available to talk to us at the August club meeting.

There being no further business, KL7LO moved, and KL7ITI seconded, that the meeting be adjourned. The motion carried at 7:49 pm AKDT.

Respectfully yours,

David B. Epstein KL7LO  
Secretary

ANCHORAGE AMATEUR RADIO CLUB, INC.  
Minutes of general club meeting, May 2, 1986  
Spenard Recreation Center, 2020 West 48th Avenue

The meeting was called to order at 7:17 pm AKDT by President Lance Dunbar AL7BK. Introductions were held; there were 79 people present.

**Club membership statistics** as of April 27, 1986, are: 327 AARC members, 146 of which are Life Members. 215 of the 327 club members are also ARRL members; and of those 215 League members, 37 are ARRL Life Members. The current ARRL/AARC ratio stands at 65.7%.

Lance announced that the Alaska Youth and Parent Foundation has asked us to **handle traffic for missing/runaway children** starting May 25. If anyone is interested, contact Lance.

**The May newsletter** was a bit late. Our present editor, NL7DK is Outside on vacation. Stand-in (and ex-) newsletter editor Bonnie Jennings NL7DF got caught up in a move and got the May issue from the printers on May 2. It will be in the mail shortly.

Lance announced that the Board had authorized a **\$250 to the Nunaka Valley Little League**, and that **two \$250 scholarships** had just been awarded to ACC.

Past President Daniel Stevens KL7WM brought us up to date on arrangements for the **Alaska Women's Gold Nugget Triathlon** on May 18. Bill Reiter KL7ITI said all is set for the **Walk For Hope** on May 3. Daniel also informed us of upcoming **Red Cross classes**, namely Introduction to Disaster Services and Damage Assessment. Lance continued his plaintive plea for help during **Mother's Day at Sears Mall**, May 10-11.

ARRL Section Manager Jim Moody NL7C spoke on the subject of **Special Service Club (SSC)** status. The AARC more than qualifies for the conferral of this status and it won't cost the club anything. We would get more information from Newington. Another neat feature of SSC is that the club could designate someone locally to be an Awards Manager -- a person delegated authority by the League to check cards for WAS and DXCC. This would cut down drastically on the processing time. KL7WM moved, and KL7EU seconded, that the AARC apply for SSC status from the ARRL. Before the vote QSL Bureau Manager John Bierman KL7GNP volunteered to be the Awards Manager. The vote followed, and the motion carried unanimously.

Lance then got on us about Field Day and the fact that we need a **Field Day** chairperson. Bill Reiter KL7ITI and (later on) Cathi Moody KL7NR (were) volunteered to check on the availability of a military base site.

And then on to **Friday Night's Main Event** -- the subject of restricting use of the 34/94 autopatch to club members only. The basic thrust of this proposal is that the autopatch is a privilege, that it costs time and money to operate and maintain, all as more particularly explained in Lance's column in the May newsletter. The new repeater software provides for access codes to the autopatch that, if employed, could restrict availability of the autopatch to

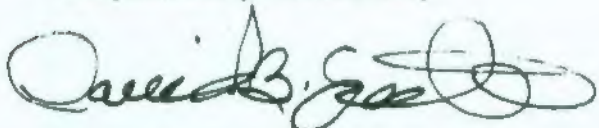

club members only. The repeater and emergency autodial functions would continue to be available to all licensed Amateurs -- club members or not. Discussion included the point that the autopatch should not be made unavailable to visitors. N7HER moved, and KL7NR seconded, that the 34/94 autopatch be restricted to club members, recommended that certified autopatch users apprise themselves of how to use the autopatch, and that certified autopatch users be issued an access code for use of the autopatch. KL7IWC desired to amend the motion, and moved that a user's manual for use of the repeater be prepared, and that it be given to certified autopatch users coincidentally with issuance of autopatch access codes. NL7FY seconded this amendment. The amendment was voted on first, and it passed. Then the motion was voted on, and it passed, also. The autopatch access code system will be in place and in operation by the June club meeting (June 6, 1986).

Following a badly-needed break, Bill Hall KL7IKR and Pat Danly KL7DS told us of their experiences as mushers in the 1986 Iditarod Trail Sled Dog Race.

Door prizes were then apportioned. There was a popular demand from the throng for **insights into nominations for 1986-87 club officers** (elections will be held at the June club meeting). Some names were bandied about, but since the official lists were not available at this meeting, I decided to refrain from naming names lest I make an unintentional mistake. If ya wanna know, you'll just have to come to the meeting in June. Then you get to vote, too!

Bill Barker WB5MYU was presented his **Life Membership certificate** (#136). Then, since we were all plumb tuckered out, the meeting was adjourned by the harried AL7BK at 9:35 pm AKDT.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "David B. Epstein", with a stylized flourish at the end.

David B. Epstein KL7LO  
Secretary

## MAY 1986 VHF REPORT

Not too much to report this month, I'm into my summer traveling season. And hope to be able to report on the two meter activities from the Bristol Bay area next month.

The AARC voted this last month to restrict the use of the STANDARD phone patch to ONLY AARC Club members, This will take effect on 1 June 1986. All AARC members will receive in the mail a Individual Access Code. Remember you ONLY need this code for getting access to the repeater for STANDARD phone patch's, you DO NOT need the code for AUTODIAL or EMERGENCY Numbers. You also may activate the function and then allow a visitor, and then dial a number for them. PLEASE do not release either your Individual code or the access code for running a patch. You as licensed amateurs are responsible in part, and the trustee is totally responsible for the LEGAL operation of the repeater. This action by the AARC will help slow down some of the abuse's of our patch, and help insure that we continue to have a patch and for that matter a repeater for our use.

If you have questions regarding the use of your Individual Access Code or the repeater operation in general, please call one of the Control Operators. If this question is related to the access code's for individual functions PLEASE call them on the phone or meet with them in person.

Hope you all have a good summer, if you are in the King Salmon area during the latter part of May or through June, look me up at the BLM camp. Or call on 146.52 (I will monitor that one, and 146.34/94 - Repeater at Dillingham)

73

Doug Dickinson KL7IKX  
AARC VHF Chairman

## Y L POINT OF VIEW

Well, it's time to resurrect the YL Point of View. I'm back again as some of you may see from the Call sign.

Some water, some hamming and several events have gone under the bridge. We had good YL participation in the Iditaski, Jr. Iditarod, Sr. Iditarod, both the Walk For Hope in Anchorage and Eagle River, and the Mother's Dsy Program.

PARKA (Polar Amateur Radio Klub Association) is alive and well and headed up by NL7DL President; KL7IF Lorraine, Vice-President; NL7HK Nancy, Secretary; KL7IO Lynn, Treasurer. We decided to make every other month a technical meeting and every other month a social meeting. By technical, we would have someone tell us or show us something we need to know about our radios or just a question and answer session or anything anyone wanted any information about. The social meeting might be a get-to-gether at someone's or a lunch at a restaurant or any activity we would like to do. PARKA

would like to extend an invitation to the non-ham wives to come to the social meetings. Although this does not mean that you can't come to the technical meetings. We would love to have you come to any or all meetings. But at the social meetings there will be no ham talk, unless you want to. The next social meeting will be a picnic at Lone KL7PA's camp which is at Mile 43 north of Seward. It should be a fun weekend with everyone bringing their favorite salad, and we will probably have hot dogs, too.

Getting to the more technical aspect of the YLPOV, I know there are some new YL hams out there. Please come to the PARKA meetings, especially the Technical ones. Bring your questions and things you don't understand and we will try to arrange it so that your questions can be answered, and don't be afraid of your mike.

See you at the meeting! Bring a friend with you.

73's  
Sharon KL7VL

## HANDIHAMS

I am interested in starting a Handiham Program here in Alaska. Handihams' is a program for handicapped people who want to become Amateur Radio Operators, or who are already hams and need assistance in furthering their interest in Amateur Radio.

I have written to the Courage Center in Golden Valley, Minnesota and they sent me a letter explaining the program, with some brochures and applications for the program. If you know of anyone who is handicapped and would like to become an Amateur Radio Operator or who otherwise needs assistance and qualifies for the program, Please call me.

The Handiham program will provide educational materials and basic radio equipment for those who cannot afford equipment at this time. If a person cannot afford to buy equipment at all the program will provide equipment on a pay as you go basis. I'm not sure exactly what pay as you go means in this instance. I have to find out more details.

If you can be a part of this program, any help will be greatly appreciated.

KL7AA/R MAILBOX'S

-----

The MAILBOX allows AARC users with call signs stored in the controller's non-volatile memory to leave messages for other users. The repeater has the following messages stored away for your use.

- |                            |                            |
|----------------------------|----------------------------|
| 0. Phone Home              | 1. Call Me Tonight         |
| 2. Call me on 90/30        | 3. Call me on 220          |
| 4. Call me on 25/85        | 5. Call me on UHF          |
| 6. Meet me on the ATV Rptr | 7. I hold messages for you |
| 8. Call Me on:             | 9. Call me at:             |

Mail can be entered for another user over the repeater.

In addition to the above messages up to eight numbers can be added to the end of the messages. Examples will be shown below. Mail is automatically tagged with time and date of entry. When mail is retrieved the time entered is announced, along with "today's" or "yest(erday)" to indicate the date of entry. Mail is automatically erased at midnight of the following day to prevent cluttering up the mailbox with old mail.

If mail is present the repeater will announce that it has messages waiting, if no mail is present, no message will be generated by the computer.

## USER COMMANDS

Interrogate mailbox for messages:

ID and dial 3 (unkey) if there are messages waiting the repeater will announce them. If no messages are waiting, the repeater will say "EMPTY"

To Preview the mailbox messages:

ID and dial 3 # (0-9) for messages 0-9.

To Leave a message:

ID and dial 3 (www)(xxx)(y) # zzzzzzzz : where www = call sign going to.  
xxx = your mailbox. y = message number (0-9) zzzzzzzz = up to 8 digits.

For example to leave a message to Lance AL7BK (mailbox 10) from KL7ITI (mailbox 90) to call Bill tonight, you would key AND ID, then key again, and dial 3 10 90 1, and unkey.

Or lets say Bill wanted Lance to call him at another number, Bill would key AND ID, and dial 3 10 90 9 # 5551212, and unkey.

Now the repeater will readback the message, and stick a date and time on it, and then remember it for 24 hours, and also announce that it has mail.

When a user has keyed AND ID'd and dialed 3 to find out who the messages are for he or she is going to want to get that mail out of the system. Thats easy.

First key AND ID, then key AND dial your mailbox location, and unkey. The message(s) will be read back to you.

For example, Lance wants to get the message out, he will dial AND ID, and then key in 3 10, and unkey. The repeater will respond with "AL7BK from KL7ITI call me tonight or (call me at 5551212).

Now that you've gotten your message you'll want to clear it out of the computer, thats easy also.

Key AND ID, then key again, and dial your mailbox slot followed by #, and unkey, the repeater will announce that it has cleared the message out of memory. Following our example, Lance would Key and ID, then dial 3 10 #, and unkey.

A Review of Commands for the Mailbox will be in Next months Newsletter.
